

## Intervener Training Series 2024-2025

6 Weekends of **Foundational** Training for Interveners

### What Is an Intervener?

An intervener is a trained paraprofessional staff member who works one-on-one with a child who has combined hearing and vision loss (deafblindness) to provide critical connections to other people and the environment. The intervener opens channels of communication between the child and others, provides access to information and the environment, and facilitates opportunities for learning and development.

### What Is the Importance of an Intervener?

Combined hearing and vision loss creates unique and complex challenges. These challenges are mainly in the areas of communication, concept development, and social and emotional access and development. An intervener responds to these challenges by serving as a bridge to the world for the child who has both hearing and vision loss (deafblindness).
